- Kresge Eye Institute, MI
- Lenox Hill Hospital-Manhattan Eye, Ear and Throat Institute, NY
- Mayo Clinic, MN
- Medical University of South Carolina, SC
- New York-Presbyterian University Hospital of Columbia and Cornell, NY
- Northwestern Memorial Hospital, IL
- Oregon Health and Science University Hospital, OR
- Stanford Hospital and Clinics, CA
- Tufts Medical Center Boston, MA
- UC San Diego Medical Center, CA
- UCSF Medical Center, CA
- University of Chicago Medical Center, IL
- University of Illinois Hospital, Chicago, IL
- University of Miami Hospital, FL

Smart SELECTA Duet Specifications

	YAG Photodisruptor Mode	SLT Mode
Laser Source	Q-Switched Nd:YAG	Q-Switched, frequency doubled Nd:YAG
Wavelength	1064 nm	532 nm
Energy (power)	0.3 - 10 mJ per pulse	0.3 - 2.0 mJ per pulse, continuously variable in 0.1 mJ increments
Pulse Duration	3 ns	3 ns
Burst Mode	1, 2, or 3 pulses per burst (selectable)	Single pulse
Spot Size	8 µm	400 µm
Cone Angle	16 degrees	< 3 degrees
Posterior Offset	0 - 350 µm (continuously variable)	Not applicable
Repetition rate	3 Hz (in single burst)	3 Hz
Aiming Beam	Red diode, continuously variable with adjustable intensity	Red diode, continuously variable with adjustable intensity
Cooling	Air Cooled	Air Cooled
Electrical Requirements	100 -240 VAC, 50/60 Hz, 3.15 Amps	100 -240 VAC, 50/60 Hz, 3.15 Amps
CDRH Classification	FDA IIIb	FDA IIIb
Smart Selecta Duet Table	Table height Wheelchair accessible, 945 mm max, 695 mm min, travel ~250 mm (37.8 in max, 27.4 in min, travel ~10.4 in) Table width Small: 630 mm (24.8 in) Medium: 880 mm (34.5 in), Table depth Small: 400 mm (15.7 in) Medium: 450 mm (17.8 in), Table wheel base Small: 520 mm x 440 mm (20.4 in x 17.2 in), Medium: 460 mm x 830 mm (18.1 in x 32.7 in), Total system weight <60 kg	

Risks and warnings: Smart Selecta Duet is intended solely for use by trained physicians. SLT: contraindicated for eyes with neovascular or angle-closure glaucoma. Risks include iritis, conjunctivitis and IOP rise. YAG: contraindicated for eyes with corneal pathologies and chronically elevated IOP. Risks include IOP rise, macular edema and retinal detachment. Refer to the operator manual for a complete list of intended use, contraindications and risks.

VISIBLE AND INVISIBLE LASER RADIATION
AVOID EXPOSURE TO BEAM
CLASS 3B LASER PRODUCT
Nd:YAG: 532 nm, 2 mJ Max / 3 ns pulse
Nd:YAG: 1064 nm, 10 mJ Max / 3 ns pulse
VISIBLE LASER RADIATION
DO NOT STARE INTO BEAM
CLASS 2 LASER PRODUCT
Diode Laser: 655 nm, <1 mW Max, CW
CLASS 3B LASER PRODUCT (per IEC 60825-1:2014)
CLASS IIIb LASER PRODUCT (per 21 CFR 1040.10 & 1040.11)
Complies with 21 CFR 1040.10 & 1040.11, except for deviations
permitted by Laser Notice 50, Dated June 24, 2007

RX Only

ISO 13485 CERTIFIED

Smart SELECTA Duet

Your Smart Selection for Glaucoma Care

20 Years of SLT Innovation

Lumenis, the world's pioneer of SLT technology, celebrates 20 years of SLT innovation by launching the newest anterior segment laser platform, the Smart Selecta Duet.

Smart Selecta Duet combines the advantages of Selective Laser Trabeculoplasty (SLT) with the capacity of YAG photodisruption, while also allowing titratable vitreous opacities' illumination (on-axis and off-axis).

Smart Selecta Duet encapsulates Lumenis' reliable core, offering cutting edge design, enhanced optics, and a superior panel PC with adjustable display.

Smart

Smart Selecta Duet is now available with the Smart-V upgrade:

- ✓ Titratable illumination of both anterior and posterior Vitreous Opacities
- ✓ SLT can be treated with on-axis illumination, as well as off-axis if needed
- ✓ Less red reflex: two converging light beams that allow superior visibility of the vitreous
- ✓ Effective Capsulotomy and Iridotomy at lower and more efficient power levels
- ✓ Stable solution that enables the visualization of the treatment area at all times (no flickering)
- ✓ Easily upgradable at any time with the Smart Selecta Duet

✓ Stable ✓ Reliable ✓ Upgradable

The Smart Choice for Your Clinic

Effective Treatment

Lumenis SLT is clinically proven as first line therapy for glaucoma.^{1,2} Hundreds of studies have demonstrated the effectiveness of Lumenis SLT for open angle glaucoma, with over 80% success rate for reducing IOP.^{3,4}

Signature Laser Design with Proprietary Advantages

The Smart Selecta Duet is the next generation of ophthalmic lasers, empowering doctors with numerous proprietary features:

- Automatic internal testing, ensuring power requirements
- Secondary control unit, guaranteeing power precision
- Unique temperature-controlled KTP crystal, guaranteeing laser beam stability and accuracy

Uncompromised Quality & Service

- Lumenis SLT systems are proudly manufactured in the USA
- Lumenis delivers fast service, with more than 50 direct field service engineers committed to a rapid on-site response.

Super Gaussian Beam Profile in YAG Mode

Smart Selecta Duet features a highly accurate Super Gaussian beam profile, for achieving optical breakdown (or photo disruption) with minimized energy levels.

The Smart Choice for Your Patient

The Smart Selecta Duet offers patients a safe and effective treatment. Lumenis SLT core technology puts into practice two decades of professional research and industry experience, clinically proven for the treatment of open angle glaucoma, backed by hundreds of studies.

System safety measures and a built-in energy indicator ensure accurate energy delivery throughout every treatment. Smart Selecta Duet is the SLT of choice of leading ophthalmic institutions across the USA.

Every Clinic Needs Its Lumenis SLT

Innovation is advancing at unprecedented speed, and so are the efforts to find the gold standard protocol for glaucoma care. One thing remains unchanged over the past 20 years – every clinic has numerous patients who depend on SLT treatments to secure their ocular health.

*“Studies show that **SLT is an effective primary therapy in appropriate patients**, working as well as drops without the compliance issues or side effects such as ocular hyperemia and ocular surface disease.”*
Nathan M. Radcliffe, MD^{6,7}

*“We use **SLT as first line therapy** in just about every patient that comes in, and who's a good patient, so we offer SLT as primary therapy and I think this is probably the most important role that SLT has played in the management of Glaucoma.”*
Mark A. Latina, MD⁵

Every clinic needs its SLT, we offer you the smartest. Smart Selecta Duet.
