Smart SELECTA Duet

Your Smart Selection for Glaucoma Care

Now Available with SmartV

www.lumenis.com/Ophthalmology
Lumenis, the world’s pioneer of SLT technology, celebrates 20 years of SLT innovation by launching the newest anterior segment laser platform, the Smart Selecta Duet.

Smart Selecta Duet combines the advantages of Selective Laser Trabeculoplasty (SLT) with the capacity of YAG photodisruption, while also allowing titratable vitreous opacities’ illumination (on-axis and off-axis).

Smart Selecta Duet encapsulates Lumenis’ reliable core, offering cutting edge design, enhanced optics, and a superior panel PC with adjustable display.

20 Years of SLT Innovation

Lumenis’ SLT & YAG inside, allowing on-axis and off-axis illumination and treatment

Wheelchair accessible table with convenient control features

Extremely low optical breakdown

Cutting edge design

Smart-V: anterior and posterior vitreous opacities’ illumination

Panel PC with adjustable 12” touch screen
Smart Selecta Duet is now available with the Smart-V upgrade:

- Titratable illumination of both anterior and posterior Vitreous Opacities
- SLT can be treated with on-axis illumination, as well as off-axis if needed
- Less red reflex: two converging light beams that allow superior visibility of the vitreous
- Effective Capsulotomy and Iridotomy at lower and more efficient power levels
- Stable solution that enables the visualization of the treatment area at all times (no flickering)
- Easily upgradable at any time with the Smart Selecta Duet

The Smart Choice for Your Clinic

Effective Treatment
Lumenis SLT is clinically proven as first line therapy for glaucoma.\(^1\),\(^2\)
Hundreds of studies have demonstrated the effectiveness of Lumenis SLT for open angle glaucoma, with over 80% success rate for reducing IOP.\(^3\),\(^4\)

Uncompromised Quality & Service
- Lumenis SLT systems are proudly manufactured in the USA
- Lumenis delivers fast service, with more than 50 direct field service engineers committed to a rapid on-site response.

Signature Laser Design with Proprietary Advantages
The Smart Selecta Duet is the next generation of ophthalmic lasers, empowering doctors with numerous proprietary features:
- Automatic internal testing, ensuring power requirements
- Secondary control unit, guaranteeing power precision
- Unique temperature-controlled KTP crystal, guaranteeing laser beam stability and accuracy

Super Gaussian Beam Profile in YAG Mode
Smart Selecta Duet features a highly accurate Super Gaussian beam profile, for achieving optical breakdown (or photo disruption) with minimized energy levels.

The Smart Choice for Your Patient

The Smart Selecta Duet offers patients a safe and effective treatment. Lumenis SLT core technology puts into practice two decades of professional research and industry experience, clinically proven for the treatment of open angle glaucoma, backed by hundreds of studies. System safety measures and a built-in energy indicator ensure accurate energy delivery throughout every treatment. Smart Selecta Duet is the SLT of choice of leading ophthalmic institutions across the USA.

Every Clinic Needs Its Lumenis SLT

Innovation is advancing at unprecedented speed, and so are the efforts to find the gold standard protocol for glaucoma care. One thing remains unchanged over the past 20 years – every clinic has numerous patients who depend on SLT treatments to secure their ocular health.

“We use SLT as first line therapy in just about every patient that comes in, and who’s a good patient, so we offer SLT as primary therapy and I think this is probably the most important role that SLT has played in the management of Glaucoma.”
Mark A. Latina, MD

“Studies show that SLT is an effective primary therapy in appropriate patients, working as well as drops without the compliance issues or side effects such as ocular hyperemia and ocular surface disease.”
Nathan M. Radcliffe, MD

Every clinic needs its SLT, we offer you the smartest.
Smart Selecta Duet.

The Preferred Choice of Leading Ophthalmic Institutions in the USA

- Bascom Palmer Eye Institute-Anne Bates Leach
- Eye Hospital, FL
- Wills Eye Hospital, PA
- Wilmer Eye Institute, Johns Hopkins Hospital, MD
- Massachusetts Eye and Ear Infirmary, Massachusetts General Hospital, MA
- Stein and Doheny Eye Institutes, UCLA Medical Center, CA
- Duke University Hospital, NC
- Cleveland Clinic, OH
- University of Iowa Hospitals and Clinics, IA
- USC Eye Institute-Keck Medical Center of USC, CA
- New York Eye and Ear Infirmary, NY
- W.K. Kellogg Eye Center, University of Michigan, MI
- Cullen Eye Institute-Baylor, Methodist Hospital, TX
- Dean McGee Eye Institute, OU Medical Center, OK
- Emory University Hospital, GA
- Hospitals of the University of Pennsylvania-Penn Presbyterian, PA
- Kresge Eye Institute, MI
- Lenox Hill Hospital-Manhattan Eye, Ear and Throat Institute, NY
- Mayo Clinic, MN
- Medical University of South Carolina, SC
- New York-Presbyterian University Hospital of Columbia and Cornell, NY
- Northwestern Memorial Hospital, IL
- Oregon Health and Science University Hospital, OR
- Stanford Hospital and Clinics, CA
- Tufts Medical Center Boston, MA
- UC San Diego Medical Center, CA
- UCSF Medical Center, CA
- University of Chicago Medical Center, IL
- University of Illinois Hospital, Chicago, IL
- University of Miami Hospital, FL

### Smart Selecta Duet Table

| Table height | Wheelchair accessible, 945 mm max, 695 mm min, travel ~250 mm (37.8 in max, 27.4 in min, travel ~10.4 in) |
| Table width | Small: 630 mm (24.8 in) Medium: 880 mm (34.5 in) |
| Table depth | Small: 400 mm (15.7 in) Medium: 460 mm x 830 mm (18.1 in x 32.7 in) |
| Table wheel base | Small: 520 mm x 440 mm (20.4 in x 17.2 in), Medium: 460 mm x 830 mm (18.1 in x 32.7 in) |
| Total system weight | <60 kg |

### Risks and warnings:

**Smart Selecta Duet** is intended solely for use by trained physicians. **SLT:** contraindicated for eyes with neovascular or angle-closure glaucoma. Risks include iritis, conjunctivitis and IOP rise. **YAG:** contraindicated for eyes with corneal pathologies and chronically elevated IOP. Risks include IOP rise, macular edema and retinal detachment. Refer to the operator manual for a complete list of intended use, contraindications and risks.
