

Indications for use:

The triLift™ system is intended for dermatological procedures requiring ablation and resurfacing of the skin when using triFX™ Energy (Applicator VO), as well as intended for use in dermatologic and general surgical procedures for the non-invasive treatment of mild to moderate facial wrinkles and rhytides when using TriPollar® RF Energy (Applicators 1-3). The triLift with the DMSt™ mode is intended for muscle conditioning to stimulate healthy muscles. triLift with the DMSt™ mode is not intended to be used in conjunction with therapy or treatment of medical diseases or medical conditions of any kind. triLift is intended to be operated by a trained professional who is present to monitor treatment.

Warnings and risks:

triLift is contraindicated for patients with pacemaker, defibrillator, or any implanted electronic device, metal implants in the treatment area. Side effects may appear either at the time of treatment or shortly after. Side effects may include any of the following: prolonged or significant pain damage to natural skin texture (blister, burn), excessive skin redness (erythema), excessive swelling (edema), fragile skin bruising, excessive itching, change of pigmentation (hyper-pigmentation or hypopigmentation), scarring transient skin break-out such as acne and pimples. For complete list of contraindications, please refer to the User Manual.

About Lumenis®

Lumenis is a global leader in the medical aesthetic market and is a world-renowned expert in developing and commercializing innovative energy-based technologies, including Laser, Intense Pulsed Light (IPL) and Radio-Frequency (RF). For over 50 years, Lumenis' ground-breaking products have redefined medical treatments and set technological and clinical gold-standards, revolutionizing existing treatment methods and creating solutions for previous untreatable conditions.

 **Lumenis®**
Energy to Healthcare

TRILIFT IS THE NEWEST TREATMENT IN FACIAL AESTHETICS THROUGH A SEQUENCE OF PATENT-PENDING TECHNOLOGIES. IT'S FROM LUMENIS, THE INVENTORS THAT GAVE THE INDUSTRY IPL AND CO2 AND IS RECOGNIZED AS THE FACIAL EXPERTS.

trilift is a strategic expansion of your clinic's portfolio, offering the exceptional results of cutting-edge innovation. trilift is the first treatment in the market to use Dynamic Muscle Stimulation (DMSi) in combination with RF technology to tone muscles, reduce wrinkles, and smooth the surface of the skin, achieving an effect similar to a face lift. It activates the facial muscles to achieve a well-defined, toned, and lifted look.

Integrated with DMSi for enhancing the quality of the skin's appearance, triFX RF microneedling skin resurfacing and TriPollar RF are used to reduce facial wrinkles, tighten the skin, smoothen its texture, and plump it by regenerating collagen and elastin. (1) The extraordinary, rejuvenated outcome of the trilift treatment makes it a vital step towards satisfied patients, offering them an immediately visible face lift effect that is further enhanced over time with every additional session.

BELIEVE AND SEE THE RESULTS

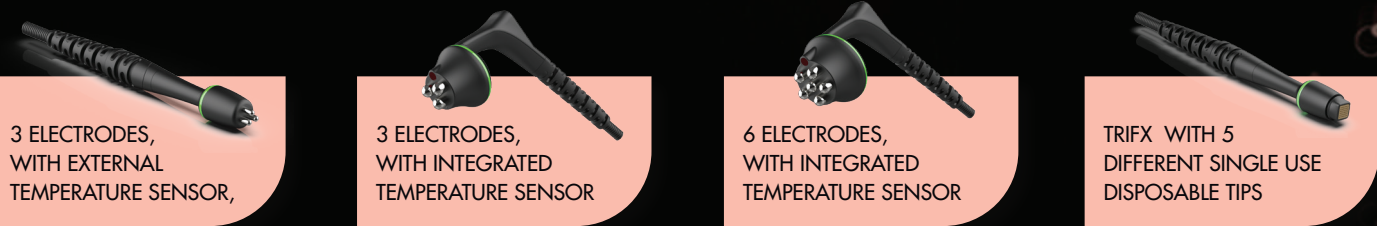

TRILIFT TREATMENT PROTOCOL FEATURES SEQUENTIAL TREATMENT OF HEALTHY MUSCLE TONING AND SKIN REJUVENATION AND OFFERS A HOLISTIC APPROACH OF TREATING THE SKIN FROM WITHIN. DYNAMIC MUSCLE STIMULATION, LEADING TO LIFTING AND TONING OF THE MUSCLES, AFTER VOLUMETRIC HEATING OF THE SKIN WITH TRIPOLLAR® RF, AND FOLLOWED BY TRIFX RF MICRONEEDLING SKIN RESURFACING LEADS TO COLLAGEN REMODELING REDUCTION IN FACIAL WRINKLES, AND SKIN TIGHTENING WITH THE INCREASE OF NATURAL DERMAL VOLUME.

- Three different applicators that differ in size, each having the ability to treat in three modes – Lift Mode DMSi RF
- Two technologies alternating in a single applicator reaching both skin and muscle for improved outcome, and shorter treatment time
- Minimal floor footprint, mobile platform, to move from room to room
- Real-time in-motion milliseconds precision of temperature reading, to increase confidence in clinical results by ensuring optimal temperature throughout the treatment
- triFX applicator
Several disposable tips configurations, differing in length and density, to ensure flexibility for creating the desired clinical effect

trilift is patent pending and is the first treatment in the market to use Dynamic Muscle Stimulation (DMSi) in sequence with two other modalities to tone healthy muscles, reduce facial wrinkles, smooth, and resurface the skin, achieving an effect similar to a face lift.
